Data Analyst Bike Stores-Project Description:

- **Comprehensive Data Analysis Portfolio:** Developed a full data analysis project that demonstrated expertise in SQL, Excel, and Tableau, showcasing the ability to extract, analyze, and visualize data effectively.
- **SQL Data Manipulation & Query Optimization:** Generated comprehensive datasets by writing and optimizing complex SQL queries, including data filtering, aggregation, and table joins, to transform data from multiple databases.
- **Excel Analytics & Dynamic Dashboard Creation:** Designed dynamic Excel dashboards using pivot tables, advanced formulas, and charts, enabling detailed data analysis and data-driven decision-making.
- **Tableau Dashboard Design & Visualization:** Created interactive Tableau dashboards with a focus on user-friendly design, data accuracy, and the use of correct commands for effective visualization, providing stakeholders with key performance insights.
- **Cross-Functional Collaboration:** Collaborated with cross-functional teams to gather and understand data requirements, ensuring the developed dashboards aligned with business needs and goals.
